		ART UNIT	PAPER NUMBER	
		2627		
		MAIL DATE	DELIVERY MODE	
		09/04/2007	PAPER	

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)
	09/779,912	SINGER, NEIL
	Examiner K. Wong	Art Unit 2627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 12 June 2007.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-61 is/are pending in the application.
 - 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-59 and 61 is/are rejected.
- 7) Claim(s) 60 is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date: _____
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO/SB/08)	5) <input type="checkbox"/> Notice of Informal Patent Application
Paper No(s)/Mail Date: _____	6) <input type="checkbox"/> Other: _____

Art Unit: 2627

This is a response to remarks filed on 6/12/07.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims (1, 2, 6-19, 22-31, 35-58 and 61) are rejected under 35 U.S.C. 102(b) as being anticipated by Scaramuzzo, Jr. et al (5465035 – as Scaramuzzo).

Regarding claim 1: Scaramuzzo discloses a procedure of using a position-velocity table to control a dynamic system (col. 3, lines 17-18 of Scaramuzzo), the procedure including the steps of:

generating a position variable for the system (col. 5, lines 33-35 and col. 7, lines 34-42 of Scaramuzzo);

determining a velocity command for the system using the position-velocity table (col. 5, lines 29-36, col. 7, lines 15-57 and col. 9, line 64 to col. 10, line 8 of Scaramuzzo), the determining step determining the velocity command based on the position variable (col. 8, lines 4-24 of Scaramuzzo);

shaping the velocity command in order to generate a shaped velocity command (col. 8, lines 50-56 and col. 12, lines 27-40 of Scaramuzzo);

and controlling the system based on the shaped velocity command, wherein the shaping step reduces unwanted vibration in the dynamic system (col. 8, lines 25-39 of Scaramuzzo).

Regarding claim 2: Scaramuzzo depicts in figures 2 and 3 wherein the method controls a component of the dynamic system, the component comprising a head of a data storage device; and wherein the controlling step controls the head to move among various tracks of a data storage medium in the data storage device.

Regarding claims 6-9: claims (6-9) have limitations similar to those treated in the above rejection(s), and are met by the reference as discussed above. Claim 6 however also recites the following limitations of "table having N ($N > 2$) dimensions" which Scaramuzzo discloses in col. 7, lines 33-37.

Regarding claims 10-13: claims (10-13) have limitations similar to those treated in the above rejection(s), and are met by the references as discussed above. Claim 10 however also recites the following limitations of "plurality of trajectories" which Scaramuzzo discloses in col. 7, lines 33-57 and col. 9, lines 26-63.

Regarding claim 14-19 and 22-29: claims (14-19 and 22-29) have limitations similar to those treated in the above rejection(s), and are met by the references as discussed above. Claim 14 however also recites the following limitations of "... for reducing unwanted vibration..." which Scaramuzzo discloses in col. 8, lines 25-39.

Regarding claims 30-31, 35-58 and 61: apparatus claims (30-31, 35-58 and 61) are met the method of Scaramuzzo is in use.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2627

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims (3-5, 20-21, 32-34 and 59) are rejected under 35 U.S.C. 103(a) as being unpatentable over Scaramuzzo, Jr. et al (5465035) in view of Singhose et al (5638267).

Regarding claims 3-4 and 20-21: the reason for Scaramuzzo is stated in above rejections. Scaramuzzo is silent on the capabilities of the specific for the inverse shaper (col. 12, lines 27-39 of Scaramuzzo). Singhose et al is relied on the specific of the inverse shaper (see abstract and col. 3, lines 35-40 of Singhose et al).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to includes the inverse shaper in Scaramuzzo as taught by Singhose et al. The rationale is as follows: one of ordinary skill in the art would have been motivated to eliminate the exact desired frequency of the vibration as suggested in col. 38, lines 40-42 of Singhose et al.

Regarding claim 5: the combination of Scaramuzzo and Singhose et al depicts that wherein the measured position of the component is determined after the controlling step controls the component; and wherein the measured position of the component is fed back to the determining step following the controlling step (figure 77 of Singhose et al and see associated descriptions for details).

Regarding claims 32-34: apparatus claims 32-34 are met when the methods of Scaramuzzo and Singhose et al are in use.

Regarding claim 59: the combination of Scaramuzzo and Singhose et al teaches that of the partial fraction expansion equations for dynamic system in col. 11, lines 57 to col. 12, line 6 of Scaramuzzo and in col. 9, line 9 to col. 10, line 9 of Singhose et al.

Allowable Subject Matter

Claim 60 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 6/12/07 have been fully considered but they are not persuasive.

Regarding remarks filed (6/12/07) on page 3: applicant asserts that Scaramuzzo fails to disclose the position-velocity table. Applicant is directed to col. 7, lines 15-57 of Scaramuzzo where Scaramuzzo describes the position (move length/distance/displacement/location) – velocity (rate/speed or $R=D/T \Rightarrow$ rate = distance * time) is stored in a table for seeking or moving the head to a desired location/position. Thus, Scaramuzzo discloses a position-velocity look up table (P-V table) as defined by the artisan of the art. Furthermore, applicant is his or her own lexicographer that which using the term P-V table for the static seek current command values.

Regarding remarks filed (6/12/07) on page 3: applicant asserts that Scaramuzzo fails to disclose the table having N ($N>2$) dimensions in col. 7, lines 33-37. In col. 7, lines 33-37, Scaramuzzo describes the table or the storage memory matrix to have the

Art Unit: 2627

dimensions ($N > 2$) for the parameters or components of the position/velocity. Thus, Scaramuzzo does disclose the dimensions ($N > 2$) greater than 2.

Regarding remarks filed (6/12/07) on page 4: applicant asserts that Scaramuzzo fails to teach a plurality of trajectories. Applicant is directed to col. 7, lines 51-57 and col. 9, lines 26-63 of Scaramuzzo.

Hence forth, the rejection to the claims stands.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iwasaki et al (5917789), Jones (5738904), McClure et al (4350941), Lewis (4751441), Tomatsuri et al (5600221) and Yamaguchi (JP01278109A) are cited for P-V table.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. Wong whose telephone number is (571) 272-7566.

Art Unit: 2627

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, H. Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
